DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 20, 27 and 28 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over J Miebs et al. (Cited art by the applicant, Flexible Recipe Handling and Batch Control at KNP Maastricht).

Regarding claim 1, Miebs discloses all the claimed invention of an automation system for batch processing (figure 3), including at least one material model (top of the pyramid), an industrial control system (bottom of the pyramid), with associated automation components (Plant level), at least one process model (Recipe control level).

Regarding claims 20 and 27, as stated above, figure 3 of Miebs also includes a material reservation method and system (Order allocation).

Regarding claim 28, even though, Miebs does not positively disclose a computer readable medium, but it is inherent property of Miebs of having a computer readable medium.

Allowable Subject Matter

3. Claims 2-19, 21-26 and 29-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Elsbree, Pan et al., and Havekost et al. disclose related art.
